

Aero Engine Solutions Partners with Honor Flight South Florida and Spirit Airlines

Aero Engine Solutions (AES) proudly joined forces with Honor Flight South Florida and Spirit Airlines this past weekend to send 80 U.S. military veterans on an unforgettable journey to Washington, D.C., to visit the memorials dedicated to their service and sacrifice.

The Honor Flight mission is to transport America's war veterans to the nation's capital to reflect at their memorials - a powerful tribute that often provides emotional closure for those who served in World War II, Korea, and Vietnam. For many of the veterans on this flight, it was their first opportunity to see the monuments built in their honor.

The AES team supported the event from departure to return by participating in the celebratory sendoff, donating hospitality for all of the veterans the night before the flight, and volunteering on the trip.

Thank You's

Thank you to Spirit Airlines for providing a dedicated aircraft and crew for the day-long trip, as well as hosting us at your facilities for a warm send off reception.

Thank you to Honor Flight South Florida, a non-profit organization run entirely by volunteers, who coordinated every detail from logistics and safety, to the heartwarming return ceremony that drew crowds of supporters waving flags, holding signs, and cheering as veterans walked through the terminal upon their return.

Thank you to our veterans for your service, your courage, and your sacrifices. Your commitment to protecting our freedoms is a debt we can never fully repay. It was our privilege to be part of this day dedicated to honoring you.

Aero Engine Solutions remains committed to supporting the veteran community and honoring those who have served. This event reflects the company's belief in giving back and recognizing the people who make freedom possible.
